

BHI-15 (A)

Conventional Looks

Many professionals and shooting enthusiasts prefer the old-school flavor of traditional-style AR rifles. The Blackheart International team, however, believes that conventional styling doesn't have to come at the cost of reduced performance standards. That's why the BHI-15 (A) stands tall in the traditional AR category.

The BHI-15 (A) delivers the "retro" look and feel of traditional ARs by adding a standard six-position stock, A2 pistol grip, detachable carry handle with adjustable rear peep, front sight assembly and standard-style hand guard. The difference, of course, between this rifle and its competitors is the same attention to high-quality, precision-machined components and assembly procedures as seen in the BHI-15 (S), BHI-15 SPR and BHI-15 Executive Package. Core to the BHI-15 (A) is a BHI-15 forged MIL-SPEC lower receiver, forged MIL-SPEC A3 flat top upper receiver, MIL-SPEC bolt carrier group, and chrome-lined Criterion 16-inch barrel. Other features include an A2 flash hider, MIL-SPEC trigger group and Wolff Springs for maximum reliability.

Designed and manufactured for second-to-none performance under extreme conditions, the BHI-15 (A) represents the most accurate tactical semi-auto 5.56mm carbine on the market today that's built in the spirit of the traditional-looking AR platform.

Unconventional Performance
